

Touch-down of The Tampa Bay Tornado! (Transendental physic)

An extraterestrial visitation by an identifiable flying object, treated at some length in the scriptures of old, when The son of man claims he had a like visitation Twice - once at the river Chebar and then again out in The plains, as he again saw what appears To be on The order of what is represented in The above - barring, of course, The pier and the many Twentieth ~~vehicles~~ century vehicles, together with other construction of a late date. From the account it appears that the visitation took place in The night-Time as lamps or lanterns were let down from and hoisted up into The overhead cloud, incidentally, which appeared to be on Fire. The author Therefore take The liberty To disclose The millenniums old apparition as it would appear in the day Time. That such a visitation actually could Take place herein St. Petersburg in the near future is believeable when considering that a related extraterrestrial event took place only a few hundred miles From here at the city of Mobile Alabama in connection with the shooting of the movie Close Encounter of the Third Kind, for a period of the duration of the Filming. Daniel Christiansen, March 1981.

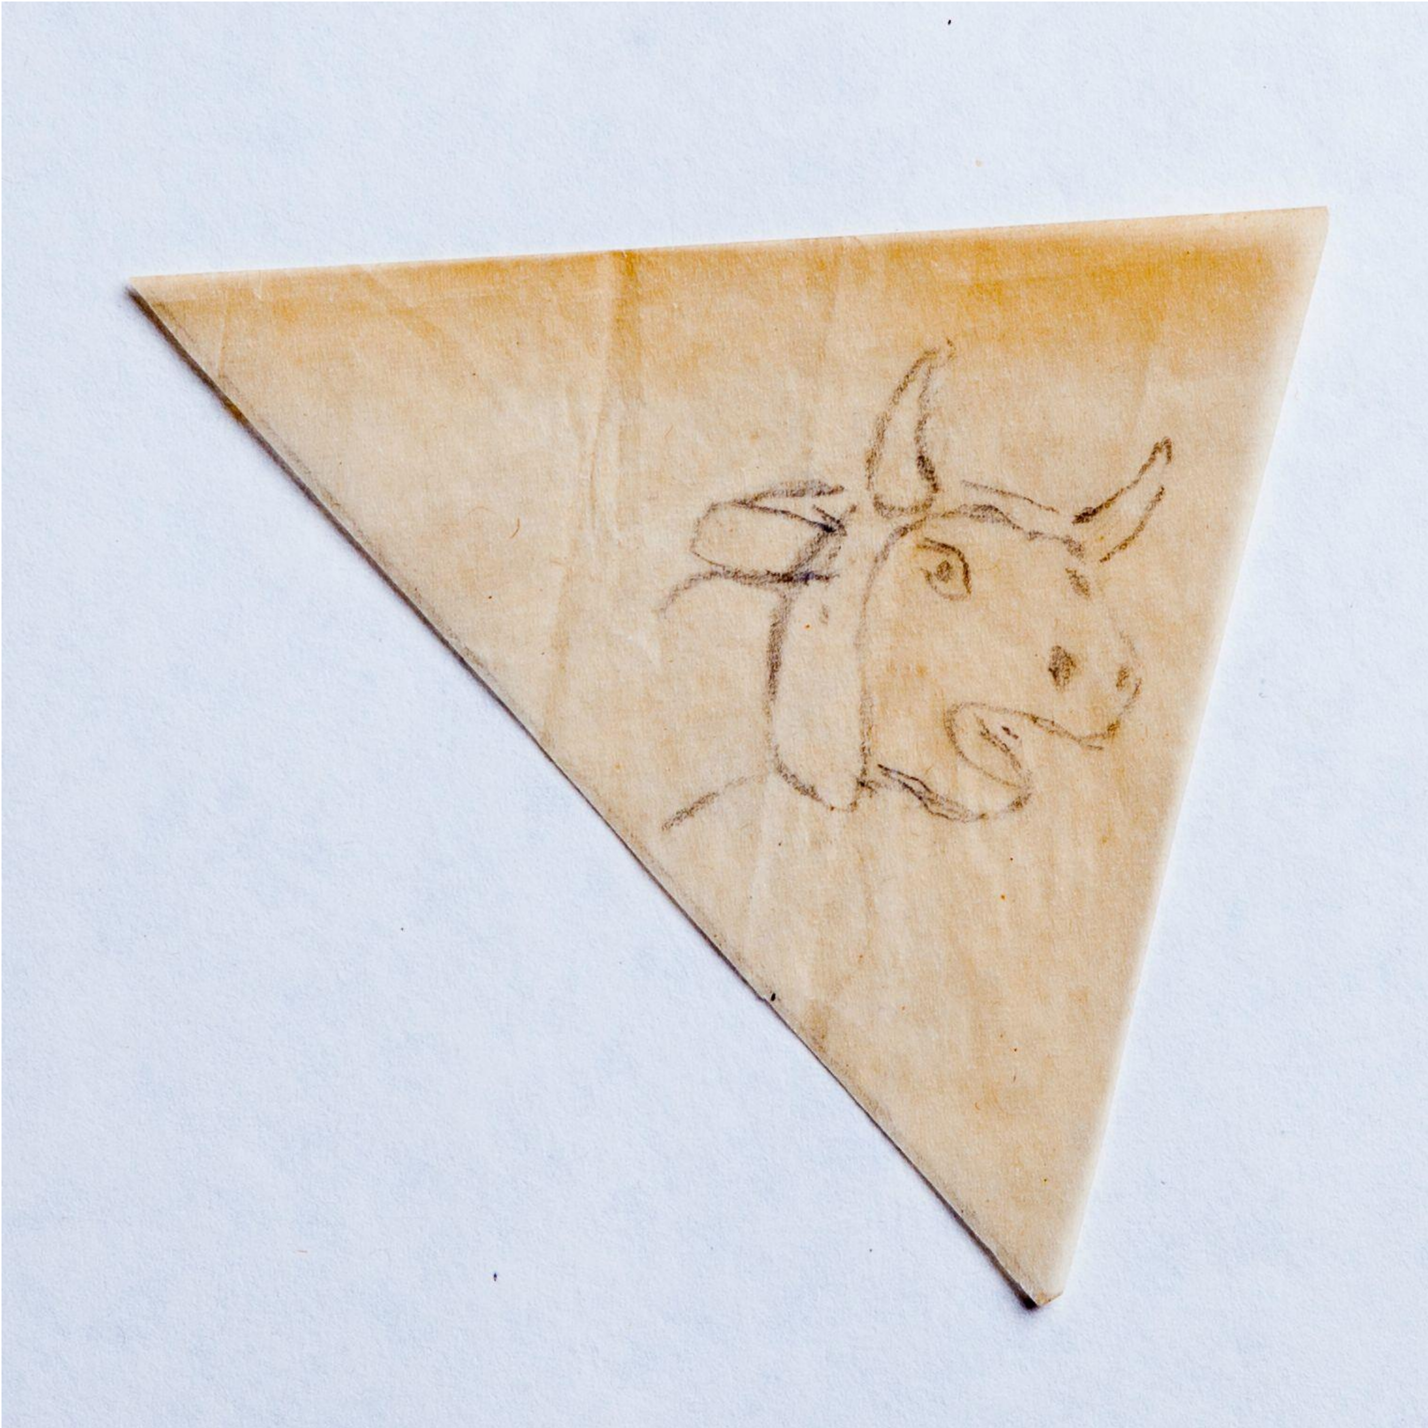

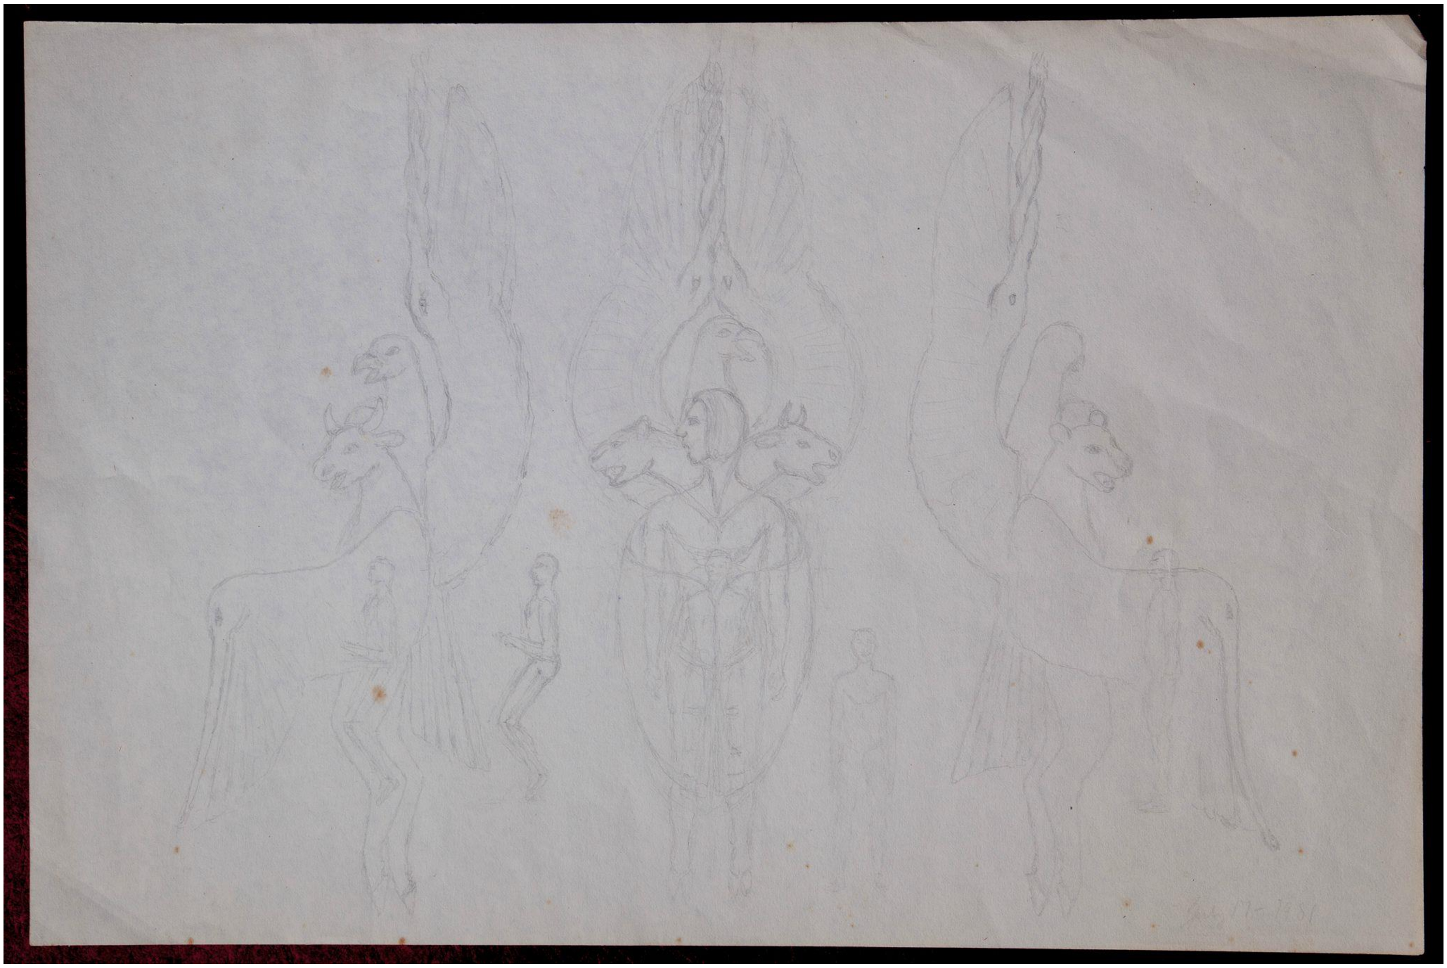

A Trone may produced in no time and engles, like humans, may emerge.
For landing and balancing Craft,
Measures like these shown
may be taken. Despite
its size and heavy weight,
The cloud like craft may come to
To secure rest, as shown. The numerable spin-
wheel with-
In the craft will keep it steady.
The wheels will, when desired, levitate the whole craft
The U.F.O. does, It is about time that
some one besides myself
believe in the U.F.O. The measure
here indicated is of course most
likely in place
in the craft
Brazil. In less than 5 minutes
The craft could be secured
Carl Sagan.
The Jewish astronomer
said that he believe
Let Elmer and Bodil & Their children see this.
There is
civilization
in our Galaxy more advanced

About 10 years ago, when in N. Plainfield N.J., I was working on the above biblical theme; it seemed to me then, as it had for about 25 centuries, since the matter had been observed and recorded by the prophet Ezekiel, that a likely title for the apparent phenomenon should be
"Cloud o Concealment". Now, however, since the cloud no longer is there to act as a screen of obscuration, but is turned off, while leaving the telescopically retractable spotlights in action - for to illuminate with the appropriate color - in this case amber color - what supposedly lurked in and
behind the cloud, the title for the now evident exaltation could well be: "the Cloud of Revelation". Since the cloud no longer conceals the matter, but is turned on and off at will, even as an engineer of a steam locomotive, or the helmsman of a giant ocean liner of old, turned on a cloud in the process of
blowing a whistle of warning or otherwise in executing a salute, so also may the cloud formation be executed in the above theme; but with a significant difference. Due to the gravity generating action of the wheels - that is, the four wheels detached, plus the wheels attached to the Cherubim
plus the wheels attached to the upper structure - an inversion of the normal earth gravity is setup and within the field of its effectiveness the cloud or vapors will sink downwards instead of upwards, as it normally would, and the amber colored lights playing on the cloud will make it appear as a fire.
